Java Development

Software Development Engineer
Chennai

Experience: 1-8 years

Salary: 10LPA – 50 LPA

What You'll Do:

M2P Fintech is looking for Software Development Engineer to build scalable software systems that are high-performance, highly available, highly transactional, low latency and massively distributed. As part of a cross functional team, you will be working in a fast-paced and agile work environment delivering quality and innovative solutions that have immediate business impact.

You need to take the challenges and ownership that comes while developing a complex system. You should also be a team player with a knack for visual design and utility. Some of the Key responsibilities include:

- Develop object-oriented models and design data structures for new software projects and implement business logic and data models with a suitable class design.
- Conduct software analysis, programming, testing, and debugging, as well as recommending changes to improve the established processes.
- Recommend software solutions to emerging needs in banking functionality and report ability.
- Solve complex problems in an innovative way and deliver quality solutions while taking ownership and accountability of assigned things.
- Demonstrate good learnability and adopt technologies that help build large scale, performant, reliable and sustainable systems.
- Collaborating with peers and architects on all elements of the development process.

Who You'll Need to Be:

- B.E or B.Tech in Computer Science or any equivalent degree.
- Strong coding skills with strong hands-on and practical working experience in Java Development.
- Strong competencies in Data Structures, algorithms and their space-time complexities.
- Good problem-solving skills, coupled with strong analytical thinking and communication.
- Excellent debugging skills.
- Ability to understand business requirements and translate them into technical requirements.
- Working knowledge of architectures, trends, and emerging technologies.
- Solid understanding of the full software development life cycle.

Who We Are:

M2P Fintech acts as a glue between businesses and banks and are Asia's first Neo Banking platform.

- Founded by three passionate fintech enthusiasts in 2014, we started out with a dream of making fintech accessible to everyone.
- Today, we power over 80% of fintech transactions in India and have a presence in 20 markets worldwide.
- Ranked among the top 100 high-growth companies in the Asia Pacific, we deliver futuristic customer-centric fintech solutions through cutting-edge APIs, technology integration, and back-office support.
